

## Information to people who want to sail with the yacht "Hoppet av Brantevik".

Due to the ongoing Covid-19-pandemic, the Association "Jakten" has decided on the following advice, restrictions, and procedures before and during the sailings to minimize the spread of infection and provide opportunities for adequate infection tracing if necessary. Consultation with the Regional Centre for Disease Control, Skane, has been carried out. The sailings are planned in line with and adherence to current restrictions/recommendations regarding the pandemic situation. However, the planning is subject to change.

### Advice:

1. In order to participate in sailing, you should be healthy and not bothered by any of the following symptoms or signs of illness:  
  
Headache, fever, cough, sore throat, rhinitis, diarrhea.
2. If you belong to a medical risk group, you are advised not to participate in the sailing but this does not constitute an absolute obstacle. You have a great responsibility yourself and decide for yourself. Medical risk groups include:  
Chronic lung disease  
Severe cardiovascular disease  
Active cancer or ongoing treatment  
Diabetes  
Severe obesity
3. If you have had Covid-19 infection and fully recovered, have tested positive for antibodies or have been vaccinated, you are likely to be immune to a new infection and reasonably do not spread any infection. There are therefore no obstacles to participate in the sailing.

### Restrictions:

1. For day sailings, the number of passengers is a maximum of 14. For longer sailings there are sleeping places on board for a maximum of 4-5 passengers, this is to allow sufficient distance below deck. Ashore berths are arranged for other passengers for an additional fee.
2. During day sailings, no food or drink is served. For longer sailings, food and drinks are served on board. It is then essential that the maximum distance is kept between people at the long table below deck. In good weather, food and drinks can also be consumed on deck.

### Routines:

1. In addition to the full name, all participants must also provide up-to-date contact details to secure a contact after sailing, if necessary.
2. The advice and recommendations of the Public Health Agency of Sweden regarding body contact, distance keeping, hand hygiene shall be applied on board.
3. Hand sanitizer is available on board.
4. If passengers fall ill during the sailing with symptoms or signs of infection (see above, Advice no 1), isolation can take place in a secluded space on board and the sick person is provided with a mask and visor. Passengers who fall ill as described above are advised to immediately notify the skipper of their condition.

Brantevik in July 2021

Lars Kindsjö, Chairman of the Association "Jakten".
